EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Canceled claims 18-51 and 56-66.

2. The following is an examiner's statement of reasons for allowance:

Regarding claim **1**, no prior art could be located that teaches or fairly suggests the claimed structure in combination with the claimed operating limitations (control signals and voltages) during the claimed time intervals (first, second, third).

Regarding claims **2, 3, 5, and 83 (now renumbered 2, 4, 5, and 3 respectively)**, these claims depend on claim 1 and therefore are allowed.

Regarding claim **67 (now renumbered claim 6)**, no prior art could be located that teaches or fairly suggests the plurality of non-zero voltages being provided from a reset control circuit to the gate of a reset transistor in combination with the rest of the limitations of the claim.

Regarding claims **68-70 (now renumbered claims 7-9)**, these claims depend on claim 67 and therefore are allowed.

Regarding claim **71 (now renumbered claim 10)**, no prior art could be located that teaches or fairly suggests the claimed operating condition limitations during the first and second time periods for the claimed structure.

Regarding claims **72-74 (now renumbered claims 11-13)**, these claims depend on claim 71 and therefore are allowed.

Regarding claim **75 (now renumbered claim 14)**, no prior art could be located that teaches or fairly suggests the claimed structure in combination with the claimed operating limitations (control signals and voltages) during the claimed time intervals (first, second, third).

Regarding claims **76-79 (now renumbered claims 15-18 respectively)**, these claims depend on claim 75 and therefore are allowed.

Regarding claim **80 (now renumbered claim 19)**, this claim is allowed for similar reasons to claim 67.

Regarding claims **81 and 82 (now renumbered claims 20 and 21)**, these claims depend on claim 80 and therefore are allowed.

Regarding claim **84 (now renumbered claim 22)**, no prior art could be located that teaches or fairly suggests the claimed sampling limitations during the claimed sample and hold period in combination with the claimed reset transistor receiving the claimed signals.

Regarding claims **85 and 86 (now renumbered claims 23 and 24)**, these claims depend on claim 84 and therefore are allowed.

Regarding claim **87 (now renumbered claim 25)**, no prior art could be located that teaches or fairly suggests the connection of three different reset signal levels to the gate of a reset transistor where one of the source/drain regions is connected to a controllable voltage source that provides two different voltage levels in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NICHOLAS G. GILES whose telephone number is (571)272-2824. The examiner can normally be reached on Monday through Friday from 7:30am to 4:00pm EST.
